

## Organic Gardening 2010 – renewed, refreshed, revitalized

- larger trim size
- new expert voices
- greater focus on food
- enhanced photography

As the essential resource for any gardener, Organic Gardening provides the most current and authoritative information available, with a focus on showing our readers how to live lightly from the ground up.

With double digit growth in newsstand sales, 2008 Capell's Circulation Honors, and four years of continued rate base increases, Organic Gardening is the natural place for advertisers who want to reach a vital, growing audience of conscious consumers.

Organic Gardening brings readers the good things that come naturally to life...
